

Successful Job Search Model and Key Networking Tips

Tip 5:

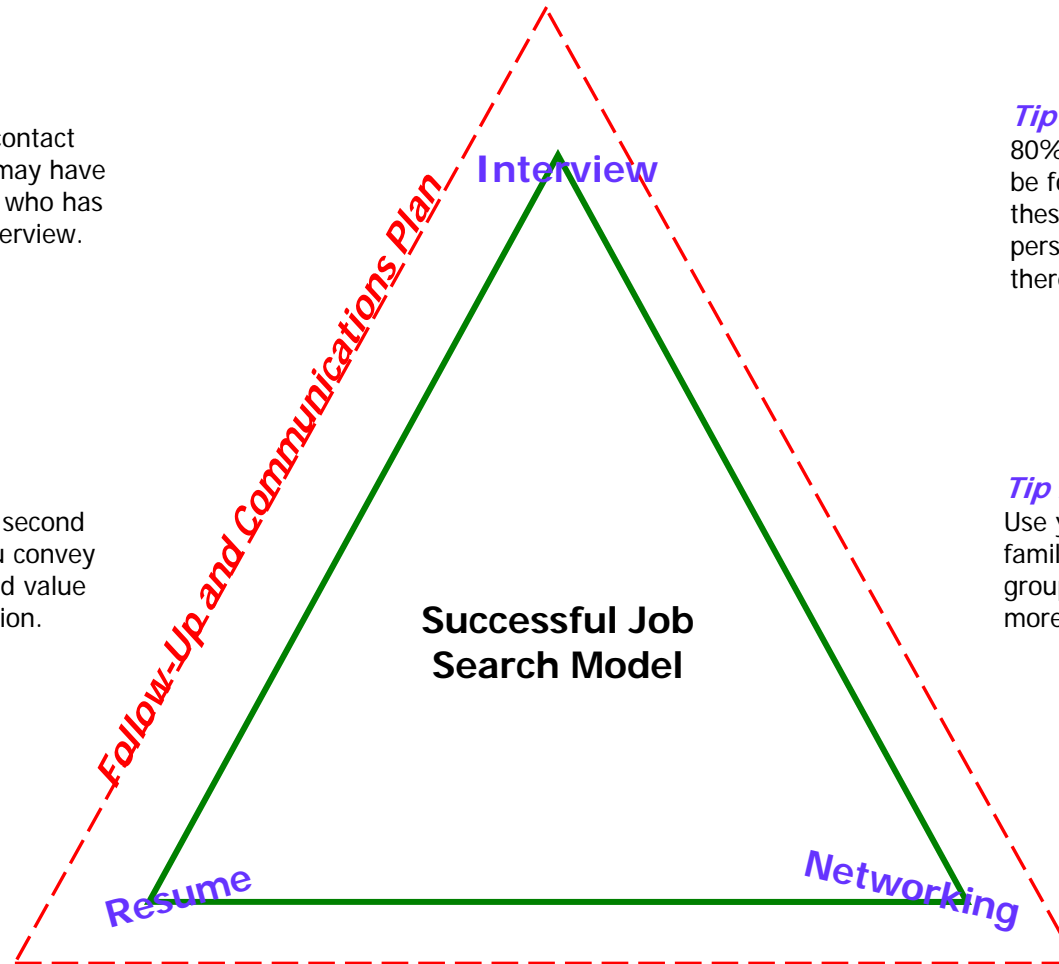

Treat any face-to-face contact with an individual who may have a job or know someone who has a job opening, as an interview.

Tip 4:

Have a well crafted "30 second commercial" to help you convey your talents, passion and value you add to an organization.

Tip 3:

Always thank the people in your network. Everyone is busy and acknowledging the gift of their time and attention is critical.

Tip 1:

80% of your job search time should be focused on networking. Build these skills and cultivate person-to-person relationships; even before there is a posted job opening.

Tip 2:

Use your network; i.e., friends, family, PTA contacts, religious groups, neighbors, etc. You know more people than you think.
